

Learning Manager at a Glance

CORSKILL Australia recognises the changes of the learning approach within industry sectors to integrate e-learning into their workplace development plan as a more cost effective and efficient method of training. CORSKILL Australia has tailored the **Learning Manager** module for our clients who require or are considering expanding to areas that require access to a delivery platform and the other systems required for the online delivery of learning experiences and the creation of e-portfolios for their trainees. The **Learning Manager** module is designed to accompany our **Training Manager – Level 2**. The **Learning Manager** module is accessed as a hosted system.

CORSKILL has interfaced its Training Manager module/s with **Moodle** or **Dokeos** for the delivery of online delivery of learning experiences and with **Mahara** for the creation and continuous updating of individual trainee e-portfolios.

Moodle

Moodle is a free and open-source e-learning software platform. It has a significant user base with 45,721 registered and verified sites, containing 32 million users in 3 million courses (as of January, 2010).

Dokeos

Dokeos is a company dedicated to open source Learning Management Systems. Its main product is a SCORM-compliant open source learning suite used by multinational companies, federal administrations and universities in some 60 countries for a total of 21,110,172 users.

Mahara

Mahara is a fully featured open source electronic portfolio, weblog, résumé builder and social networking system, connecting users and creating online communities. Consistent with the literature, Mahara was designed to provide users with the tools to create a personal and professional learning, development and showcasing environment.
